

VaXinate™ Treatment Protocol.

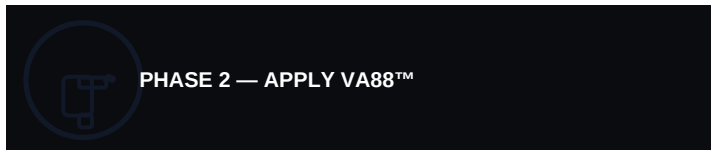

Circle your stage level before beginning treatment:

STAGE 1 — Preventive	STAGE 2 — Active (Moderate)	STAGE 3 — Active (Extreme)
No visible signs; preventive treatment.	Seam markings; eggs visible under UV; bugs hidden.	Adult bugs visible. Repeat protocol in 3 days. Do not re-occupy until 2nd application.

About VA88™: Nontoxic to humans and mammal pets. Kills bed bugs on contact by disrupting their outer waxy layer. Residue in fabrics remains lethal for **1 year** — newly introduced bugs die within 6–8 hours. Wear gloves during preparation. **Do not use with alcohol, ammonia, or bleach — these denature VA88.**

PHASE 1 — PREPARE THE AREA

PHASE 2 — APPLY VA88™

1. Remove all debris from floors, closets, drawers, shelves. Vacuum; seal bag airtight and discard.
2. Move all furnishings away from walls.
3. Remove drawers; place on end to expose inside and underside.
4. Remove cushions/pillows from chairs and couches; place on floor.
5. Close drapes to expose all fabric surfaces.
6. Loosen headboards, pictures, wall hangings — expose space behind for stream spray.
7. Open electrical outlets and switch boxes.
8. Remove all bedding/pillowcases; bag and launder. Seal and discard bags.
9. Separate box springs from mattress to expose frame and supports.
10. Turn off fans and forced-air units while spraying.
11. Disassemble décor items to expose all parts.
12. **DO NOT remove furnishings from the area** — may spread infestation.
1. Wear latex/rubber gloves. Eye protection optional; rinse eyes with tap water if contact occurs.
2. Vigorously mix VA88; pour into a **clean** dedicated sprayer. Rinse container with distilled water; add rinse to sprayer. Do not further dilute.
3. Verify sprayer: no filter in tank; has both fan and stream settings. Shake vigorously; re-shake every 10–15 min.
4. Hold nozzle **~30 in.** from surface. Cover 3–4 ft/sec. **Do not overlap** — excess clumps when dry.
5. **Stream** on all baseboards (farthest corner first) and behind all wall-mounted items.
6. **Stream** on all furniture joints and hard-to-reach areas.
7. **Fan** at all seams on both sides of box springs and mattress. Remove and bag bottom cover.
8. **Fan** on drapes/window coverings — treat, twist to reverse, treat again.
9. **Fan** on all cushions, pillows, bedding, drawers, and disassembled parts — all surfaces.
10. **Fan** on carpeted areas under and around beds.
11. **Fan** evenly over all box spring and mattress surfaces; focus on seams and underside.
12. When dry, check with **black light** before re-assembly — treated areas glow. Retreat low-glow spots.
13. Re-assemble furniture; return to position; re-secure wall items; untwist drapes.
14. **Fan** on all remaining carpet including closets and entry areas.
15. Final **black light** check of full area. Retreat any low-glow areas.
16. Sign Record of Application with date and time.

Record of Application.

I, the undersigned, attest that all statements below are true and complete, and that the prescribed protocol was completed in careful compliance with this Guide.

Date Completed:	_____ (Month / Day / Year)
For the Benefit of:	_____ (Property Owner / Manager)
Property Address:	_____
Unit Number(s) Treated:	_____
Stage Level (circle one):	Stage 1 Stage 2 Stage 3
Technician Name (print):	_____
Technician Signature:	_____
Company / Organization:	_____
License Number (if applicable):	_____

Important: Failure to follow and complete this Protocol may invalidate your Guarantee. Proper application eliminates current infestation and vaXinates the treated area for one year.
